

Polar Bear's Weekly Newsletter

17.1.25

This week in Polar Bears...

It has been a very quiet week in polar bears this week with lots of children feeling poorly. We have been thinking about how to stop germs spreading by washing our hands lots. We have continued to learn about the cold parts of our world and which animals live there. We have also learned about the equator. We have been building boats like the one in the story. They had to be able to float and hold two small world characters. This challenged our problem solving skills and we had to use lots of diamond and emerald power when our first attempt didn't work. We then investigated which other materials float and sink.

Phonics and Maths...

In phonics we have been practising our reading and spelling. We have enjoyed playing games on the whiteboard to support our learning.
In maths we have been matching numerals to amounts and learning how to use a number track.

Next week...

We will begin our new topic of under the sea through the text 'Commotion in the Ocean,' We will be learning about the different seas and oceans, what lives in them and about how we can look after our oceans.
In maths we will be looking at ordering numbers and how we know which number comes next.
In phonics we will revisit the sounds ai, ee, igh and oa.

How can you support our learning?

If we are feeling well enough it would be good to support us recognising numbers in the environment both at home and whilst out and about. Have a great and hopefully healthy weekend.
