

Polar Bear's Weekly Newsletter

2.5.25

This week in Polar Bears...

In Polar bears this week there has been lots of water play to help us keep cool. Some of us even enjoyed a foot spa! The stage has also been popular this week. A big show was put on for us to watch but only if we were lucky enough to get a ticket. We have continued to learn about seeds and growing. We investigated different fruits to find the seeds and then set up our own experiment. We have planted some of the seeds we found in the fruit and some of the actual fruits with their seeds in to see which will grow. Our prediction is that the actual fruits will not grow but the seeds will.

Phonics and Maths...

We have been using our phonics to write about our text this week – The Enormous Turnip. We have written alternative endings and speech bubbles for the characters. We also acted out the story. In maths we have been learning strategies to count large amounts.

Next week...

We will be looking at animal life cycles and how they have similarities and differences. This will be linked to our text of the week: Tadpole's Promise.
Our cress seeds are almost ready to eat and we are looking forward to making and eating cress sandwiches!

How can you support our learning?

Please can we remind you to send your child into school with a named water bottle as we only have a couple of spare ones? Help us practice counting large amounts by encouraging us to make a collection of items and then count them. We can show you the different strategies we have learned.

Have a great weekend!
