

Polar Bear's Weekly Newsletter

23.5.25

This week in Polar Bears...

We have learned some fascinating facts about insects and mini-beasts this week. We know they are invertebrates, so don't have a back bone, we know there is only one mini-beast in Antarctica and that grasshoppers were around before the dinosaurs! We have been looking for mini-beasts in our garden and at forest school. So far we have found worms, snails, woodlice, spiders and slugs and have talked about the different habitats that they live in. Lots of us have also been very creative and made 3D mini-beasts from boxes and bottles as well as 2D ones from paper and card. Outside in the garden we have been building habitats for mini-beasts to live in, making sure they have food, water, shelter and space. Alongside this learning we discovered food chains and enjoyed learning about them too.

Phonics and Maths...

We have been using our phonics to write about our favourite mini-beasts this week. Some of us have been including adjectives in our writing to make it more interesting for our reader. In maths we have been learning different ways to make 10.

After half term...

We will be learning about keeping ourselves fit and healthy and as it is child safety week we will also think about the ways we can keep ourselves safe.

How can you support our learning?

After half term, our PE lessons will move to a Tuesday afternoon and we will be going to the sports stadium. Therefore we will need trainers bringing in please. If you are able to support our stadium visits by walking down and back with us that would be great. Thank you for all your support.

Have a fabulous half term.
