

Polar Bear's Weekly Newsletter

27.6.25

This week in Polar Bears...

It has been an amazing week for collaborative learning...our imaginations have been working overtime! Together we have built: a safari park, a unicorn valley and a boat. We have had a movie night in the book area with 'popcorn' and performed as a band on the stage. In the gardens small world area, we have built farms for the animals, complete with bridges and garages for the tractors. In the water tray, we have worked together to use the guttering to move water around to different containers and as a result we have learned lots about forces! We have also been fascinated by the insects we have found in our garden, which included a grasshopper and an Elephant Tiger Moth – one of us said "our world has so many beautiful creatures, we are so lucky." We have also worked together to re-design part of our classroom. What an incredible week...

Phonics and Maths...

We are loving how independent we now are with our reading and writing! We have been trying to read books from our book nook and writing notes for each other. Our independent sentences in our morning tasks are becoming more complex with conjunctions and adjectives in them.

We are using are number skills create tickets for shows and sell boat trips with money in the till.

Next week...

We are very excited about our first school trip! We have been talking about the activities we will do and learning more about farms.
The weather is looking like it will be very hot so please make sure we have sunscreen on, a hat and a water bottle.

How can you support our learning?

In school we have looked at the Longdown Dairy Farm website to help us prepare for our trip. It would be good if you could look at this with us too, especially if you think we might be a little bit anxious about it. Please also let staff know if you know we might get travel sick.

Have a lovely weekend.
Thank you for all your support.
