All Saints Church of England Primary School

'Playing our part in God's plan as we journey together to achieve the best for ourselves and others'

Supporting Pupils with Medical Needs Policy

Hampshire County Council

July 2014

Name of Unit/Premises/Centre/ School:	**All Saints C of E Primary School**
Name of Responsible Manager/Headteacher:	**Jane Hall**
Date Policy approved and adopted:	**March 2026**
Date Due for review:	**March 2027**

All Saints is a calm, happy, inclusive and welcoming school, founded on love and hope, which works together to build a better community for everyone. We respect and care for all God's people (of all faiths and none) and His world, playing our part in God's plan as we journey together to achieve the best for ourselves and others. This policy is held within this vision and is shaped by our school values of Love, Hope and Community.

Introduction

Section 100 of The Children and Families Act 2014 places a duty on the governing body of this school to make arrangements for supporting children at their premise with medical conditions. The Department of Education have produced statutory guidance 'Supporting Pupils with Medical Conditions' and we will have regard to this guidance when meeting this requirement.

We will endeavour to ensure that children with medical conditions are properly supported so that they have full access to education, including school trips and physical education. The aim is to ensure that all children will medical conditions, in terms of both their physical and mental health, are properly supported in school so that they can play a full and active role in school life, remain healthy and achieve their academic potential.

It is our policy to ensure that all medical information will be treated confidentially by the Headteacher and staff. All administration of medicines is arranged and managed in accordance with the Supporting Pupils with Medical Needs document. All staff have a duty of care to follow and co-operate with the requirements of this policy.

Where children have a disability, the requirement of the Equality Act 2010 will apply.

Where children have an identified special need, the SEN Code of Practice will also apply.

We recognise that medical conditions may impact social and emotional development as well as having educational implications.

Key Roles & Responsibilities

The Governing Body is responsible for ensuring that:

- arrangements are in place to support pupils with medical conditions. In doing so they should ensure that such children can access and enjoy the same opportunities at school as any other child. The governing body should ensure that their arrangements give parents and pupils confidence in the school's ability to provide effective support for medical conditions in school. They must ensure that the arrangements they put in place are sufficient to meet their statutory responsibilities and should ensure that policies, plans, procedures and systems are properly and effectively implemented.

The Headteacher is responsible for ensuring that:

- their school's policy is developed and effectively implemented with partners. This includes ensuring that all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation. The Headteacher should ensure that all staff who need to know are aware of the child's condition. They should also ensure that sufficient trained numbers of staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations. The Headteacher have overall responsibility for the development of individual healthcare plans.

Teachers and Support Staff are responsible for:

- having an understanding of any medical condition of children in their care. Any member of school staff may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so. Although administering medicines is not part of teachers' professional duties, they should take into account the needs of pupils with medical conditions that they teach. School staff should receive sufficient and suitable training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions. Any member of school staff should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

The School Link Nurse is responsible for:

- notifying the school when a child has been identified as having a medical condition which will require support in school. Wherever possible, they should do this before the child starts at the school. They would not usually have an extensive role in ensuring that schools are taking appropriate steps to support children with medical conditions, but may support staff on implementing a child's individual healthcare plan and provide advice and liaison, for example on training.

Local Arrangements
Identifying children with health conditions

We will aim to identify children with medical needs on entry to the school by working in partnership with parents/ carers and following the process outlined in the document 'Process for identifying children with a health condition' produced by the Southern Health School Nursing Team in conjunction with the Children's Services Health and Safety Team. We will use the 'Health Questionnaire for Schools' to obtain the information required for each child's medical needs to ensure that we have appropriate arrangements in place prior to the child commencing at the school to support them accordingly.

Procedures will also be in place to cover any transitional arrangements between schools, the process to be followed upon reintegration or when pupils' needs change, and arrangements for any staff training or support. For children starting at a new school, arrangements should be in place in time for the start of the relevant school term. In other cases, such as a new diagnosis or children moving to a new school mid-term, every effort should be made to ensure that arrangements are put in place within two weeks.

Where a formal diagnosis is awaited or is unclear, we will plan to implement arrangements to support the child, based on the current evidence available for their condition. We will ensure that every effort is made to involve some formal medical evidence and consultation with the parents.

Individual health care plans

We recognise that Individual Healthcare Plans are recommended in particular where conditions fluctuate or where there is a high risk that emergency intervention will be needed, and are likely to be helpful in the majority of other cases, especially where medical conditions are long term and complex. However, not all children will require one. The school, healthcare professional and parent will agree based on evidence when a healthcare plan would be inappropriate or disproportionate.

Where children require an individual healthcare plan it will be the responsibility of the Headteacher to work with parents and relevant healthcare professionals to write the plan.

A healthcare plan (and its review) may be initiated in consultation with the parent/carer, by a member of school staff or by a healthcare professional involved in providing care to the child. The Headteacher will work in partnership with the parents/carer, and a relevant healthcare professional e.g. school, specialist or children's community nurse, who can best advise on the particular needs of the child to draw up and/or review the plan. Where a child has a special educational need identified in a statement or Educational Health Care (EHC) plan, the individual healthcare plan will be linked to or become part of that statement or EHC plan.

We may also refer to the flowchart contained within the document 'Process for identifying children with a health condition' for identifying and agreeing the support a child needs and then developing the individual healthcare plan.

We will use the individual healthcare plan template produced by the DfE to record the plan.

If a child is returning following a period of hospital education or alternative provision (including home tuition), that we will work with Hampshire County Council and education provider to ensure that the individual healthcare plan identifies the support the child will need to reintegrate effectively.

We will ensure any plan is reviewed annually ready for the start of each academic year or sooner if there is a change in the child's needs or medication.

Statutory Requirement: When deciding what information should be recorded on individual healthcare plans, the governing body should consider the following:

- the medical condition, its triggers, signs, symptoms and treatments;
- the pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues e.g. crowded corridors, travel time between lessons;
- specific support for the pupil's educational, social and emotional needs – for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- the level of support needed (some children will be able to take responsibility for their own health needs) including in emergencies. If a child is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring;
- who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the child's medical condition from a healthcare professional; and cover arrangements for when they are unavailable who in the school needs to be aware of the child's condition and the support required;
- arrangements for written permission from parents and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours;
- separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the child can participate, e.g. risk assessments;
- where confidentiality issues are raised by the parent/child, the designated individuals to be entrusted with information about the child's condition; and
- what to do in an emergency, including whom to contact, and contingency arrangements. Some children may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their individual healthcare plan.

Staff training

Staff must not administer prescription medicines or undertake any health care procedures without the appropriate training (updated to reflect any individual healthcare plans).

In some cases, written instructions from the parent or on the medication container dispensed by the pharmacist may be considered sufficient, but ultimately this is for the school to decide, having taken into consideration the training requirements as specified in pupils' individual health care plans. A first-aid certificate does not constitute appropriate training in supporting children with medical conditions.

All new staff will be inducted on the policy when they join the school through a meeting with the School Administrative Officer. Records of this training will be stored on individual induction forms in the school office.

All nominated staff will be provided awareness training on the school's policy for supporting children with medical conditions which will include what their role is in implementing the policy. This training will be carried out annually at the beginning of the academic year.

The awareness training will be provided to staff through an INSET day meeting and a copy of the school's policy.

We will retain evidence that staff have been provided the relevant awareness training on the policy by retaining signature sheets.

Where required we will work with the relevant healthcare professionals to identify and agree the type and level of training required and identify where the training can be obtained from. This will include ensuring that the training is sufficient to ensure staff are competent and confidence in their ability to support children with medical conditions. The training will include preventative and emergency measures so that staff can recognise and act quickly when a problem occurs and therefore allow them to fulfil the requirements set out in the individual healthcare plan.

Any training undertaken will form part of the overall training plan for the school and refresher awareness training will be scheduled at appropriate intervals agreed with the relevant healthcare professional delivering the training.

A 'Staff training record– administration of medicines' form will be completed to document the type of awareness training undertaken, the date of training and the competent professional providing the training.

The child's role

Where possible and in discussion with parents, children that are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be recorded in their individual healthcare plan. The healthcare plan will reference what will happen should a child who self-administers refuse to take their medication (this will normally be informing the parent/carer at the earliest opportunity).

Where possible we will endeavour to ensure that children can carry their own medicines and relevant devices or have easy access to allow for quick self-medication. We will agree with relevant healthcare professionals/parent the appropriate level of supervision required and document this in their healthcare plan.

Managing medicines on School Premises

The administration of medicines is the overall responsibility of the parents/carers. Where clinically possible we will encourage parents to ask for medicines to be prescribed in dose frequencies which enable them to be taken outside of school hours. However, the Headteacher is responsible for ensuring children are supported with their medical needs whilst on site, therefore this may include managing medicines where it would be detrimental to a child's health or school attendance not to do so.

We will not give prescription or non-prescription medicines to a child under 16 without their parent's/carers written consent (a 'parental agreement for setting to administer medicines' form will be used to record this), except in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents. In such cases, we will make every effort to encourage the child or young person to involve their parents while respecting their right to confidentiality.

A documented tracking system to record all medicines received in and out of the premises will be put in place. The tracking system used is The Children's Services Medication Tracking Form.

The name of the child, dose, expiry and shelf life dates will be checked before medicines are administered.

On occasions where a child refuses to take their medication the parents will be informed at the earliest available opportunity.

We will only accept prescribed medicines that are in date, labelled, provided in the original container as dispensed by the pharmacist and include instructions for administration, their dosage and storage. Insulin is the exception, which must still be in date but will generally be available to schools inside an insulin pen or a pump, rather than its original container.

Children who are able to use their own inhalers themselves are encouraged to carry it with them. If the child is too young or immature to take personal responsibility for their inhaler, staff should make sure that it is stored in a safe but readily accessible place, and clearly marked with the child's name.

Controlled drugs will be securely stored in a non-portable container which only named staff will have access to. We will ensure that the drugs are easily accessible in an emergency situation. A record will be kept of any doses used and the amount of the controlled drug held in school. There may be instances where it is deemed appropriate for a child to administer their own controlled medication. This would normally be at the advice of a medical practitioner. Where an individual child is competent to do so and following a risk

assessment, we may allow them to have prescribed controlled drugs on them with monitoring arrangements in place.

Homely Remedies

We do not administer non-prescribed medicines brought from home. The School maintains a stock of the following non-prescribed medicines. Every parent will be given the opportunity to sign a consent form, giving permission for the medications listed to be administered as required and only after verbal permission has been sought directly before administration. Keeping homely remedies on site ensures School can keep track of expiry dates and ensure equity for all; no child shall be at a disadvantage if their parent is unable to come into school to administer medication as parents can consent to School taking on this role. Medicines held on site:

- liquid paracetamol (Capol)

These will not be administered without first checking maximum dosages and when previously taken. We will always inform parents and ask for verbal consent.

We will never administer aspirin or medicine containing Ibuprofen to any child under 16 years old unless prescribed by a doctor.

Any homeopathic remedies to be administered will require a letter of consent from the child's doctor and will be administered at the discretion of the Head teacher.

Emergency medicines will be stored in a safe location but not locked away to ensure they are easily accessible in the case of an emergency.

Types of emergency medicines include:

- Injections of adrenaline for acute allergic reactions
- Inhalers for asthmatics
- Injections of Glucagon for diabetic hypoglycaemia

Other emergency medication i.e. Rectal diazepam or Buccal Midazolam for major seizures will be stored in accordance with the normal prescribed medicines procedures (see storage section).

Storage

All medication other than emergency medication will be stored safely in a locked cabinet, where the hinges cannot be easily tampered with and cannot be easily removed from the premise.

Where medicines need to be refrigerated, they will be stored in the medical room refrigerator in a clearly labelled airtight container. There must be restricted access to a refrigerator holding medicines. This refrigerator will be locked accessible only to staff.

Children will be made aware of where their medicines are at all times and be able to access them immediately where appropriate. Where relevant they should know who holds the key to the storage facility.

Medicines such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to children and not locked away. We will also ensure that they are readily available when outside of the school premises or on school trips.

Storage of medication whilst off site will be maintained at steady temperature and secure. There will be appropriately trained staff present to administer day to day and emergency medication and copies of individual health care plans will be taken off site to ensure appropriate procedures are followed.

Disposal

It is the responsibility of the parents/carers to dispose of their child's medicines. It is our policy to return any medicines that are no longer required including those where the date has expired to the parents/carers. Parents/carers will be informed of this when the initial agreements are made to administer medicines. Medication returned to parent/ carers will be documented on the tracking medication form.

Sharps boxes will be in place for the disposal of needles when appropriate – currently this is not needed.

Medical Accommodation

The School Office and medical room will be used for all medical administration/treatment purposes. The location/room will be made available when required.

Record keeping

Statutory Requirement: The governing body should ensure that written records are kept of all medicines administered to children.
A record of what has been administered including how much, when and by whom, will be recorded on a 'record of prescribed medicines' form. The form will be kept on file. Any possible side effects of the medication will also be noted and reported to the parent/carers.

Emergency Procedures

Statutory Requirement: The Governing body will ensure that the school's policy sets out what should happen in an emergency situation. Template F: Contacting Emergencies Services form (Appendix D in the Supporting Pupils with Medical Conditions Guidance document) will be available next to the school telephone to support this.

Where a child has an individual healthcare plan, this will clearly define what constitutes an emergency and provide a process to follow. All relevant staff will be made aware of the emergency symptoms and procedures. We will ensure other children in the school know what to do in the event of an emergency i.e. informing a teacher immediately if they are concerned about the health of another child.

Where a child is required to be taken to hospital, a member of staff will stay with the child until their parents arrives, this includes accompanying them to hospital by ambulance if necessary (taking any relevant medical information, care plans etc. that the school holds).

Day trips/off site activities

We will ensure that teachers are aware of how a child's medical condition will impact on their participation in any off site activity or day trip, but we will ensure that there is enough flexibility for all children to participate according to their own abilities within reasonable adjustments.

We will consider what reasonable adjustments we might make to enable children with medical needs to participate fully and safely on visits. We will carry out a risk assessment so that planning arrangements take account of any steps needed to ensure that pupils with

medical conditions are included. We will consult with parents and pupils and advice from the relevant healthcare professional to ensure that pupils can participate safely.

Other issues

Defibrillators – we hold a defibrillator in school. This can be found in the medical room off the school office and is accessible.

Salbutamol Asthma inhalers for emergency use – stored in School Office. Only those children who have been diagnosed with asthma and have been prescribed an inhaler will be offered the use of the School inhaler in the case of emergency e.g. lost, forgotten or broken their own inhaler and where written consent has been previously received from parents.

Any electronic devices (i.e. mobile phone) will be permitted to be used in school in order to allow a child to manage their medical condition effectively (e.g. blood glucose monitoring) and will supported by designated staff to use as needed in the school office.

Unacceptable practice

Staff are expected to use their discretion and judge each child's individual healthcare plan on its merits, it is not generally acceptable practice to:

- prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary;
- assume that every child with the same condition requires the same treatment;
- ignore the views of the child or their parents; or ignore medical evidence or opinion (although this may be challenged);
- send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans;
- if the child becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable;
- penalise children for their attendance record if their absences are related to their medical condition, e.g. hospital appointments;
- prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively;
- require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs; or
- prevent children from participating, or create unnecessary barriers to children participating in any aspect of school life, including school trips e.g. by requiring parents to accompany the child.

Liability and Indemnity

Staff at the All saints Church of England Primary School are indemnified under the County Council self-insurance arrangements.

The County Council's is self-insured and have extended this self-insurance to indemnify school staff who have agreed to administer medication or undertake a medical procedure to children. To meet the requirements of the indemnification, we will ensure that staff at the school have parents' permission for administering medicines and members of staff will have had training on the administration of the medication or medical procedure.
Complaints
Should parents or children be dissatisfied with the support provided they can discuss their concerns directly with the Headteacher and the school will seek to find an acceptable resolution. If for whatever reason this does not resolve the issue, they may make a formal compliant via the school's complaints procedure. Parents/carers who wish to take the matter further may then write formally to the Chair of the Governing Body, c/o All Saints C of E Primary School.

Signature of Responsible Manager/Headteacher:	JHall
